# CONVERSION OF THE QUANTITY OF MILK PRODUCTS OBTAINED

The following coefficients are used to convert the quantities of milk products obtained from milk:

1 litre of milk = 1.03 kg of milk;

1 kg of butter = 22.50 litres of milk;

1 kg of cream = 8 to 10 litres of milk (using the calculation:  $26,30 \text{ kg of milk} \times \% \text{ milk fat in cream} / 100$ );

1 kg cheese = 10 kg cow's milk;

1 kg sheep's cheese = 6 kg sheep's milk;

1 kg goat's cheese = 12 kg goat's milk;

1 kg curd = 8 kg milk;

1 kg other dairy products (yoghurt, sour milk) = 1 kg milk;
